ENGINEERING GEOLOGY

www.elsevier.nl/locate/enggeo

Subject Index Volume 59

Alluvial fan zonation
Failure and flow development of a complex slide: the 1993 Sesa landslide 173
Andes
The monitoring and prediction of mining subsidence in the Amaga, Angelopolis, Venecia and Bolombolo Regions, Antioquia, Colombia 103
Aqueducts/tunnels — active faults
Development of engineering geology in western United States 1
Athens
The Athens earthquake (7 September 1999): intensity distribution and controlling factors 297

Bonding
Characterisation of a volcanic residual soil and its implications for large landslide phenomena: application to Tenerife, Canary Islands 115

Calculated risks
Development of engineering geology in western United States 1
Case history
Remediation and monitoring of a highway across an active landslide at Trevor, North Wales 337
Cement
Consolidation behavior of a soft mud treated with small cement content 327
Central alps
Structural constraints on deep-seated slope deformation kinematics 83
Chemical analysis
Weathering indices for rhyolitic tuff and granite in Hong Kong 147
China
Engineering geomechanical analysis and monitoring-control in design and construction of the Wuqiangxi ship lock slope, China 59
Clayey silt
Consolidation behavior of a soft mud treated with small cement content 327
Co-ordinates
Measuring fracture orientation at exposed rock faces by using a non-reflector total station 133
Colombia
The monitoring and prediction of mining subsidence in the Amaga, Angelopolis, Venecia and Bolombolo Regions, Antioquia, Colombia 103
Compaction
Mechanical behavior and microstructural variation of loess under dynamic compaction 203
Complex slide
Failure and flow development of a complex slide: the 1993 Sesa landslide 173
Consolidation
Consolidation behavior of a soft mud treated with small cement content 327
Crystallisation
Quantification of salt weathering in porous stones using an experimental continuous partial immersion method 313

Dam foundations — concrete/earthfill
Development of engineering geology in western United States 1
Debris flow
Failure and flow development of a complex slide: the 1993 Sesa landslide 173
Deep-seated gravitational deformations
Structural constraints on deep-seated slope deformation kinematics 83
Dip angle
Measuring fracture orientation at exposed rock faces by using a non-reflector total station 133
Dip direction
Measuring fracture orientation at exposed rock faces by using a non-reflector total station 133
Distribution
The Athens earthquake (7 September 1999): intensity distribution and controlling factors 297
Drainage
Environmental changes within kettle holes at Borras Bog triggered by construction of the A5156 Llanypwll Link Road, North Wales 73

Drill-core — inadequate interpretation
Development of engineering geology in western United States 1
Dry density
Weathering indices for rhyolitic tuff and granite in Hong Kong 147
Durability
Quantification of salt weathering in porous stones using an experimental continuous partial immersion method 313
Dynamic loading
Mechanical behavior and microstructural variation of loess under dynamic compaction 203

Earth dam
Detection of seepage paths in earth dams using self-potential and electrical resistivity methods 281
Earthquake
The Athens earthquake (7 September 1999): intensity distribution and controlling factors 297
Electrical resistivity method
Detection of seepage paths in earth dams using self-potential and electrical resistivity methods 281
Engineering geology
Structural constraints on deep-seated slope deformation kinematics 83
Experimental studies
Quantification of salt weathering in porous stones using an experimental continuous partial immersion method 313
Exposed rock faces
Measuring fracture orientation at exposed rock faces by using a non-reflector total station 133

Fault
The Athens earthquake (7 September 1999): intensity distribution and controlling factors 297
FEM analysis
Preliminary support design for Ankara subway extension tunnel 161
Fracture orientation
Measuring fracture orientation at exposed rock faces by using a non-reflector total station 133

Geohazards
The monitoring and prediction of mining subsidence in the Amaga, Angelopolis, Venecia and Bolombolo Regions, Antioquia, Colombia 103
Golden Gate Bridge
Development of engineering geology in western United States 1
Micro-sheeting of granite and its relationship with landsliding specifically after the heavy rainstorm in June 1999, Hiroshima Prefecture, Japan 219
Weathering indices for rhyolitic tuff and granite in Hong Kong 147
Ground improvement
Consolidation behavior of a soft mud treated with small cement content 327

Hazard
Failure and flow development of a complex slide: the 1993 Sesa landslide 173
Highways
Environmental changes within kettle holes at Borras Bog triggered by construction of the A5156 Llanypwll Link Road, North Wales 73
Remediation and monitoring of a highway across an active landslide at Trevor, North Wales 337
Hong Kong
Weathering indices for rhyolitic tuff and granite in Hong Kong 147

Impacts tunnel design
Development of engineering geology in western United States 1
Indentation tests
Determination of unconfined compressive strength and Young's modulus of porous materials by indentation tests 267
Inflow groundwater
Development of engineering geology in western United States 1
Information model
Zonation of the landslide hazards in the forereservoir region of the Three Gorges Project on the Yangtze River 51
Insuree's responsibilities
Development of engineering geology in western United States 1
Intensity
The Athens earthquake (7 September 1999): intensity distribution and controlling factors 297

Kettle holes
Environmental changes within kettle holes at Borras Bog triggered by construction of the A5156 Llanypwll Link Road, North Wales 73

Laboratory tests
Characterisation of a volcanic residual soil and its implications for large landslide phenomena: application to Tenerife, Canary Islands 115
Land-use risks
Development of engineering geology in western United States 1

Landslide destruction
Development of engineering geology in western United States 1
Landslide
Frequency–volume relation and prediction of rainfall-induced landslides 253
Micro-sheeting of granite and its relationship with landsliding specifically after the heavy rainstorm in June 1999, Hiroshima Prefecture, Japan 219
Remediation and monitoring of a highway across an active landslide at Trevor, North Wales 337
Zonation of the landslide hazards in the forereservoir region of the Three Gorges Project on the Yangtze River 51
Lessons learned — geoscience legacies
Development of engineering geology in western United States 1
Loess
Mechanical behavior and microstructural variation of loess under dynamic compaction 203

Magnitude–frequency
Frequency–volume relation and prediction of rainfall-induced landslides 253
Micro-sheeting
Micro-sheeting of granite and its relationship with landsliding specifically after the heavy rainstorm in June 1999, Hiroshima Prefecture, Japan 219
Microstructure
Mechanical behavior and microstructural variation of loess under dynamic compaction 203
Mining method
Development of engineering geology in western United States 1
Mobility index
Weathering indices for rhyolitic tuff and granite in Hong Kong 147
Modelling
Failure and flow development of a complex slide: the 1993 Sesa landslide 173
Monitoring
The monitoring and prediction of mining subsidence in the Amaga, Angelopolis, Venecia and Bolombolo Regions, Antioquia, Colombia 103
Monitoring-control
Engineering geomechanical analysis and monitoring-control in design and construction of the Wuqiangxi ship lock slope, China 59

Natural processes — acceptable geo-risks
Development of engineering geology in western United States 1
Non-reflector total station
Measuring fracture orientation at exposed rock faces by using a non-reflector total station 133
Nuclear plants
Development of engineering geology in western United States 1
Numerical modelling
Structural constraints on deep-seated slope deformation kinematics 83

Peatland
Environmental changes within kettle holes at Borras Bog triggered by construction of the A5156 Llanypwll Link Road, North Wales 73
Porosity
Quantification of salt weathering in porous stones using an experimental continuous partial immersion method 313
Porous materials
Quantification of salt weathering in porous stones using an experimental continuous partial immersion method 313
Porous rocks
Determination of unconfined compressive strength and Young's modulus of porous materials by indentation tests 267
Prediction
Frequency–volume relation and prediction of rainfall-induced landslides 253
The monitoring and prediction of mining subsidence in the Amaga, Angelopolis, Venecia and Bolombolo Regions, Antioquia, Colombia 103
Principles of practice
Development of engineering geology in western United States 1
Probabilistic analysis
Development of a probabilistic approach for rock wedge failure 233
Protective underground construction
Development of engineering geology in western United States 1

Railroad causeway
Development of engineering geology in western United States 1
Rainfall
Frequency–volume relation and prediction of rainfall-induced landslides 253
Rainstorm
Micro-sheeting of granite and its relationship with landsliding specifically after the heavy rainstorm in June 1999, Hiroshima Prefecture, Japan 219

Remedial works
Remediation and monitoring of a highway across an active landslide at Trevor, North Wales 337
Reservoir slope
Zonation of the landslide hazards in the forereservoir region of the Three Gorges Project on the Yangtze River 51
Residual soil
Characterisation of a volcanic residual soil and its implications for large landslide phenomena: application to Tenerife, Canary Islands 115
Rock mass strength
Preliminary support design for Ankara subway extension tunnel 161
Rock mass
Engineering geomechanical analysis and monitoring-control in design and construction of the Wuqiangxi ship lock slope, China 59
Rock slopes stability
Development of a probabilistic approach for rock wedge failure 233

Safety
Development of engineering geology in western United States 1
Seepage zone
Detection of seepage paths in earth dams using self-potential and electrical resistivity methods 281
Self-potential method
Detection of seepage paths in earth dams using self-potential and electrical resistivity methods 281
Settlement
Consolidation behavior of a soft mud treated with small cement content 327
Environmental changes within kettle holes at Borras Bog triggered by construction of the A5156 Llanypwll Link Road, North Wales 73
Shear strength
Mechanical behavior and microstructural variation of loess under dynamic compaction 203
Sheeting joint
Micro-sheeting of granite and its relationship with landsliding specifically after the heavy rainstorm in June 1999, Hiroshima Prefecture, Japan 219
Simulation
Development of a probabilistic approach for rock wedge failure 233
Site investigation
Environmental changes within kettle holes at Borras Bog triggered by construction of the A5156 Llanypwll Link Road, North Wales 73
Remediation and monitoring of a highway across an active landslide at Trevor, North Wales 337
Slope stability
Engineering geomechanical analysis and monitoring-control in design and construction of the Wuqiangxi ship lock slope, China 59
Structural constraints on deep-seated slope deformation kinematics 83
Soft soil
Consolidation behavior of a soft mud treated with small cement content 327
Structural geology
Structural constraints on deep-seated slope deformation kinematics 83
Subsidence
The monitoring and prediction of mining subsidence in the Amaga, Angelopolis, Venecia and Bolombolo Regions, Antioquia, Colombia 103
Subway tunnel
Preliminary support design for Ankara subway extension tunnel 161
Support design
Preliminary support design for Ankara subway extension tunnel 161

Tectonics
The Athens earthquake (7 September 1999): intensity distribution and controlling factors 297
Tenerife
Characterisation of a volcanic residual soil and its implications for large landslide phenomena: application to Tenerife, Canary Islands 115
The Three Gorges Project
Zonation of the landslide hazards in the forereservoir region of the Three Gorges Project on the Yangtze River 51
Three-dimensional
Measuring fracture orientation at exposed rock faces by using a non-reflector total station 133
Time to failure
Failure and flow development of a complex slide: the 1993 Sesa landslide 173
Tuff
Weathering indices for rhyolitic tuff and granite in Hong Kong 147

Uniaxial compressive strength
Determination of unconfined compressive strength and Young's modulus of porous materials by indentation tests 267
Unit-bid prices
Development of engineering geology in western United States 1

Volcanic landslide
Characterisation of a volcanic residual soil and its implications for large landslide phenomena: application to Tenerife, Canary Islands 115
Volcanic
Weathering indices for rhyolitic tuff and granite in Hong Kong 147
Volume index
Weathering indices for rhyolitic tuff and granite in Hong Kong 147

Weathered dacite
Preliminary support design for Ankara subway extension tunnel 161
Weathering indices
Weathering indices for rhyolitic tuff and granite in Hong Kong 147
Weathering
Micro-sheeting of granite and its relationship with landsliding specifically after the heavy rainstorm in June 1999, Hiroshima Prefecture, Japan 219
Quantification of salt weathering in porous stones using an experimental continuous partial immersion method 313
Wedge failure
Development of a probabilistic approach for rock wedge failure 233

Young's modulus
Determination of unconfined compressive strength and Young's modulus of porous materials by indentation tests 267

Zonation of landslide hazards
Zonation of the landslide hazards in the forereservoir region of the Three Gorges Project on the Yangtze River 51
